

1
2 **Appendix 1**2 **Table S1.** Number of red fox and domestic cat scat samples recovered along two-years field work.

habitat	season	Scats with remains		Scats without remains	
		red fox	domestic cat	red fox	domestic cat
park	autumn	51	0	34	25
	winter	31	0	12	23
	spring	26	0	6	18
	summer	112	0	42	19
agricultural land	autumn	38	30	13	2
	winter	28	52	2	10
	spring	20	27	1	7
	summer	73	37	8	2
forest	autumn	20	15	4	16
	winter	40	13	10	17
	spring	34	0	14	4
	summer	75	19	37	6
Total		548	193	183	149

3

4

5 **Table S2.** Multivariate Generalized Linear Model results of red fox and domestic cat diet (a) composition (prey_{IBS}) (b) composition (prey_{MNI}) across study sites
 6 (park, agricultural land and forest) and seasons (autumn, winter, spring and summer). Res.df = residual degrees of freedom, Df.diff = degree of freedom, Dev
 7 = deviation test statistic, Pr = p-value. P-values were calculated using 999 resampling iterations via PIT-trap resampling (to account for correlation in testing).
 8 Bold indicates p < 0.05.
